

PUMP THE IDO KING AGAIN

TRADITIONAL LAUNCHPADS HAVE FAILED US

Single
yield path

Single
investment exit strategy

NOW WE HAVE
Pumpkin

Traditional Launchpad

Before TGE

Nothing possible

At TGE

Sell the first batch of
unlocked tokens.

After TGE

Passively wait for tokens
to unlock and then sell
the unlocked tokens

Trade Whitelist NFT and exit

Claim project NFT and sell the
first batch of unlocked tokens.

Sell project NFT and cash in future profit

Sell unlocked tokens

Reverse minting a specific NFT and then
OTC with other users at fixed price to exit

Pumpkin

**A NFT-powered launchpad
maximizes user profits**

**Pre-Market for IDO
whitelist trading**

**Trade
unvested
allocation**

**NFT-Powered
OTC**

PRE-MARKET FOR
IDO whitelist trading

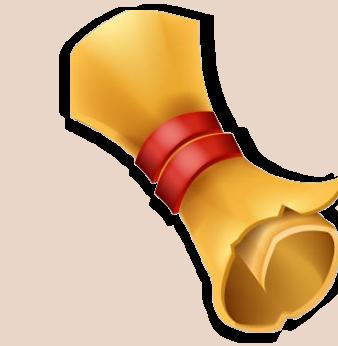

PRE-MARKET FOR

IDO whitelist trading

Participant

Project Team

TRADABILITY

Users who do not wish to participate can trade these Whitelist NFTs on the marketplace

PROFIT-LOCKING

Users can lock in profits early by selling their Whitelist NFTs before the token sale.

PRE-LAUNCH TRADING

Pumpkin enables users to trade project allocations before the official launch.

LIQUIDITY CREATION

This approach creates liquidity for project tokens before TGE.

Trade Unvested Allocation

Participant

TOKEN UNLOCKING RIGHTS

Pumpkin will integrate token unlocking rights into project NFTs according to each project's token vesting schedule. These NFTs will act as claim certificates for users to receive tokens after they are released by the project.

CUSTOMIZED RETURNS

Trading the NFTs allows users to cash in on future unvested token rights ahead of time.

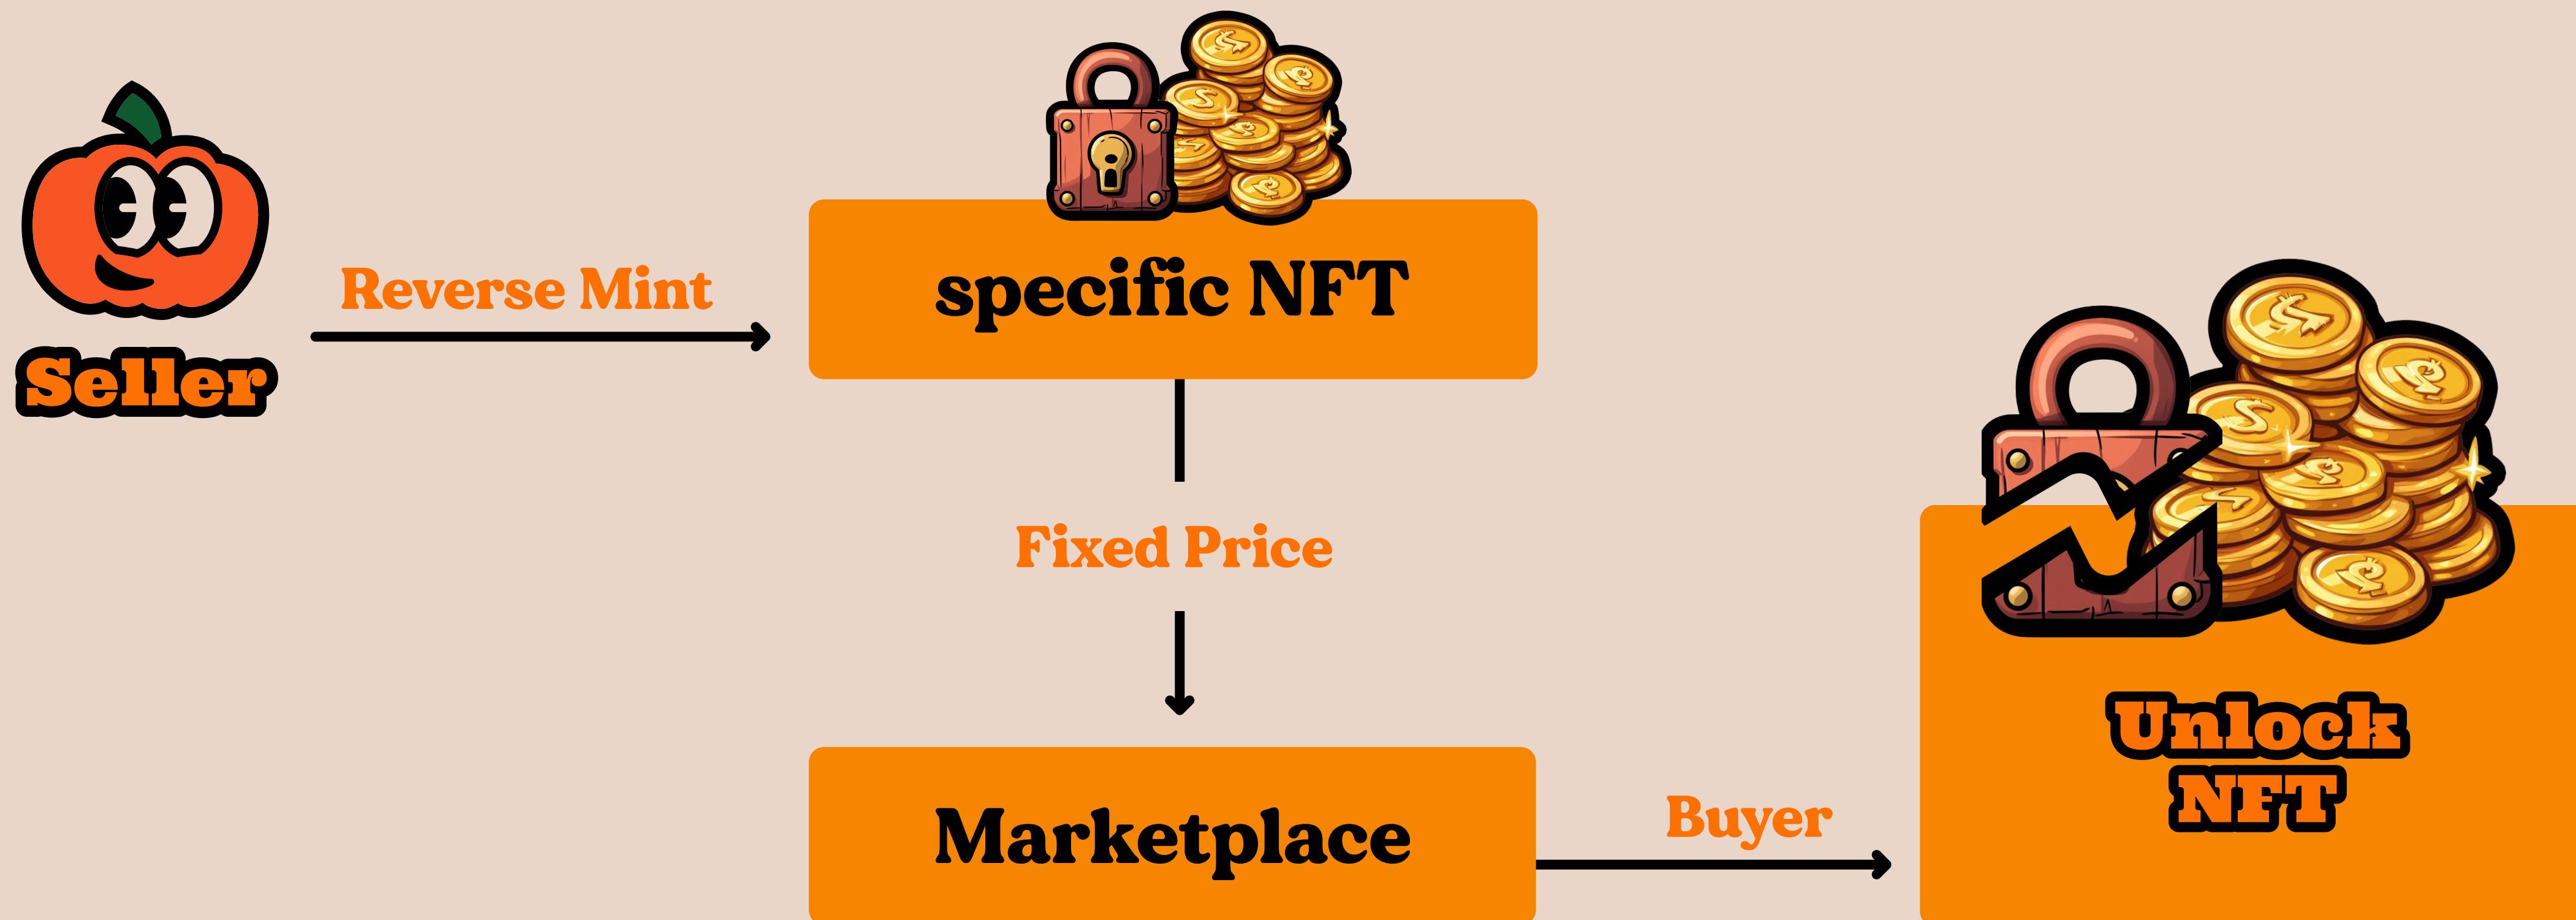

Project Team

REPURCHASE RIGHTS

The project team can repurchase future tokens at a reasonable cost by buying project NFTs.

NFT-Powered OTC

NFT-Powered OTC

Participant

REVERSE-MINTING

Users can reverse-mint any amount of project tokens into a specific NFT on Pumpkin.

FIXED-PRICE SELLING

These NFTs can be sold at a fixed price in the marketplace.

Project Team

INCREASED LIQUIDITY

This feature enhances token liquidity and both large buyers and sellers benefit from this mechanism.

Example: Project ABCD
